

Mega Catch™

The New Generation Mosquito Traps

PRO 900 Series

Trusted, proven, tested and used by thousands of US households since 2002, Mega-Catch™ Mosquito Traps have consistently out-performed competing brands in independent scientific trials. The New Generation PRO 900 Series Mosquito Traps combine proven performance, ground breaking features plus Mega-Catch's™ patented technology.

✓ SMARTER

Using Advanced design features and sophisticated electronic components, Mega-Catch™ traps successfully mimic the sensory signals which attract mosquitoes and other biting insects. Heat pulsing from a powerful central core heat system with digital pulse width modulation channel allows traps to replicate subtle changes in human body temperature.

✓ SAFER

No need for propane. Mega-Catch™ traps operate from a safe 12 Volt weatherproof output cord which can be plugged into any mains power outlet. And with Universal Voltage Detection that means anywhere in the world – from New Zealand to North America.

✓ ECO-FRIENDLY

Energy efficient, the ULTRA, PREMIER XC, and PREMIER traps use less power than a 40 Watt light bulb, the ALPHA even less (20 Watts).

Mega-Catch™ mosquito traps come fully assembled – simply position, plug-in, switch on, and let Mega-Catch™ go to work on your mosquito problem.

Mega-Catch™ Mosquito Trap Comparison Table

Description	MCU-900 ULTRA	MCP-900xc PREMIER XC	MCP-900 PREMIER	MCA-900 ALPHA
Range ¹	150 ft	120 ft	100 ft	90 ft
Coverage ¹	Up to 1.5 acres ²	1 to 1.5 acres ³	.75 acre	.5 acres ²
Universal Voltage Detection 100-260/12V	✓	✓	✓	✓
Internal Heat Core	✓	✓	✓	✓
Patented CO2 Gas Attractant System	✓	✓ ³		
UV LED Lights	✓	✓	✓	✓
UV Bulb	✓	✓		
Animated Central Light Cluster	✓	✓	✓	✓
Catch Method	Bucket/Bag	Bucket/Bag	Bucket/Bag	Bag
Live Catches and Species Identification	✓	✓		
Programmable Menu	✓	✓		
Customizable MAS (Mosquito Attracting Stimuli) Settings	✓	✓		
Onboard Diagnostics	✓	✓		
Self Serviceable	✓	✓	✓	
Low Voltage Extension Cord ⁴	60 ft	60 ft	30 ft	15 ft ⁵
Standard Stand ⁶	✓	✓	✓	6
Mosquito Lure Capable ⁷	✓	✓	✓	✓
Fully Assembled ⁸	✓	✓	✓	✓

1. Measured in optimum conditions.

2. Coverage area and capture rates (by up to 300-400%) will increase when using optional CO2.

3. Upgradeable to ULTRA trap specifications with CO2 upgrade kit. This makes the XC trap CO2 capable. (The use of CO2 increases coverage area and capture rates)

4. All traps can be used with multiple low voltage extension cords (maximum of 2) to achieve a total lead length of 120ft (except ALPHA to maximum of total extension lead length of 30ft).

5. Extension cord (15ft) available as an optional accessory item for the ALPHA.

6. All traps can be used with Stand (supplied with ULTRA and PREMIER XC and PREMIER, optional accessory for the ALPHA).

7. All traps can be used with attractants.

8. All traps come fully assembled - the only assembly required is for the Standard Stand.
